Hey, I'm Jaskaran

About me

I'm a passionate frontend developer and soulful musician from India. I love combining creativity with code—whether it's crafting beautiful web interfaces or composing heartfelt melodies. Currently pursuing a BCA, I also run "jaskrnsings", a music community on Instagram, Youtube & other social media platforms. I've worked with clients globally—building websites, editing videos, and designing digital experiences.

With a strong focus on user experience, modern design, and emotional storytelling, I aim to create work that truly connects. I'm also build a DUGGI, a telegram chat bot project powered by my curiosity for tech and voice integration.

Frontend Developer   Musician   Video Editor   Creative Thinker

My Clients

I've collaborated with clients from India and the USA, offering frontend web development, branding, and video editing services. Whether designing a personal portfolio, a YouTube channel brand, or editing reels—each project is approached with creativity and precision.

Places that I worked at

Freelance Video Editor

Self-employed • 2022 - Present

Responsibility

- Edited reels, YouTube videos, and social content for creators and brands.
- Specialized in cinematic transitions, color grading, and storytelling.
- Handled projects end-to-end from script to final export.
- Built an Instagram page to attract editing clients professionally.

Independent Singer & Cover Artist

@jaskrnsings • 2021 - Present

Responsibility

- Released multiple cover songs on YouTube and Instagram.
- Built a daily cover series, showcasing consistency and passion.
- Collaborated with family and fellow musicians on bhajans and duets.
- Engaged audience with heartfelt performances and emotional themes.

AI Assistant Developer

Personal Project: FREDDY & TG Bots • 2023 - Present

Responsibility

- Developed FREDDY — a powerful AI assistant inspired by Jarvis.
- Integrated ElevenLabs API for smooth, natural female voice output.
- Built Duggi Bot for Telegram with games, wallet system, and stickers.
- Focused on human-like companionship and care-driven responses.

Frontend Web Developer

• 2022 - Present

Responsibility

- Converted modern UI designs from Figma into responsive React.js web pages.
- Used Tailwind CSS and ShadCN/UI to build aesthetic components.
- Created landing pages, and interactive portfolios.
- Collaborated with clients to refine UI/UX and deliver clean code.
